

System Component Diagram: Pet Grooming Salon Application Logic and Interactions.

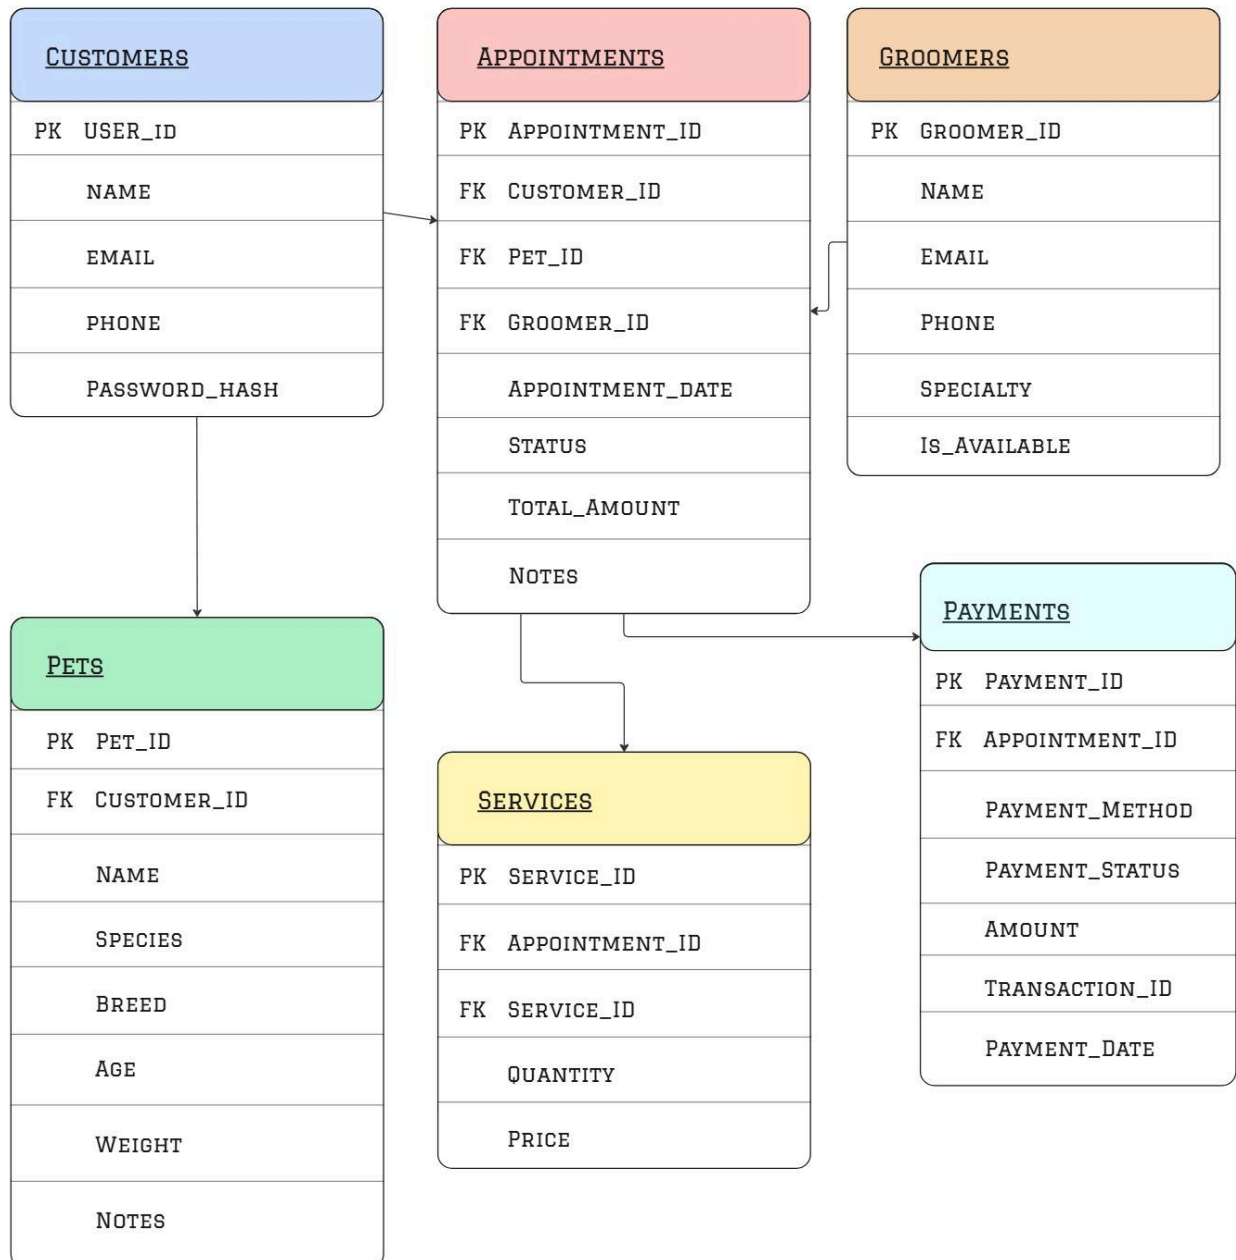

Explanation and Analysis:

- What a system component diagram is...
 - A system component diagram is used to show the main parts of a system and how they interact with each other.
- What we've got going on in our diagram and why
 - Our diagram is used to show how the customers and employees interact with the application and how the system processes all of the imputed information.
- How we intend to use it and what we will achieve using it
 - The diagram is used as a guide to help aid us with the development of the actual database, it helps to ensure all system parts connect correctly.

Database Relationship Diagram: Tables used to Show Relationships.

DATABASE RELATIONSHIP DIAGRAM:

EACH TABLE HAS A PRIMARY KEY; ARROWS SHOW THE MAIN FOREIGN-KEY RELATIONSHIPS AND CARDINALITIES
